## A NEW STRAIN OF ASTERS

### *Paul Tilford's* RESISTANT ASTERS

Dr. Paul Tilford of Ohio Agricultural Experiment station, in cooperation with the Ohio Florist's Association has developed, after years of research, a resistant strain of Asters. The table below best indicates how much more resistant this Ohio strain is as compared with standard strains currently offered by seed houses. This is reprinted from the November Ohio Florists' Bulletin.

#### RESISTANCE AND PRODUCTION OF TILFORD'S ASTERS

Variety	% Loss	Yield per Plant
Tilford's Royal Shell Pink.....	25	8.1
Commercial Strain Royal Shell Pink.....	42	7.3
Tilford's Royal White.....	25	8.3
Commercial Royal White.....	61	8.0
Tilford's Royal Purple.....	3	8
Commercial Royal Purple.....	36	10
Tilford's Rose.....	23	9.6
Commercial Royal Azure Blue.....	99.9	..

## TILFORD'S ASTERS ARE AVAILABLE IN THE FOLLOWING VARIETIES:

**Royal Purple:** This Aster is almost immune to wilt, resistance is very high.

**Royal White:** Similar to Shell Pink in resistance.

**Royal Shell Pink:** Resistance has been 80% and over in soil where ordinary Asters were 100% diseased.

**Crego Deep Rose:** A medium

sized flower which through selection has lost most of the Crego characteristics and is now more nearly the Royal type. It is very wilt-resistant.

diseases will creep in if ordinary precautions are not taken. Any injury to the roots at time of transplanting creates ideal conditions for disease organisms to start active growth in the plant.

You can almost entirely eliminate injury by growing your seedlings in "Easi-Off" plant bands. More than any other wood band, they can be removed with less injury to the root system and ball of soil. No cutting with a sharp knife—no twisting or bending. Just a slight pull with the finger and your plant is ready to set out. No check in growth! No injury that would make for easy entrance of disease.

"Easi-Off" Plant Bands are available in all popular sizes. Order early and get your bands set up in the bench or flats ahead of time.

## LIGHT YOUR ASTERS FOR EARLIER FLOWERING

March is the time to start your Asters for cloth houses. In order to save time and get the crop ready when prices are good, some of your Asters should be lighted. Some of you may be acquainted with the directions, but for those of you who are not, this is written.

When the seedlings are ready to prick-off into pots or bands or flats, start lighting. Use 25-40 watt lamps spaced five feet apart and two feet above the bench. Apply from dusk and for three or four hours thereafter each day. Continue lighting until the plants are ready to set out.

### GROW YOUR ASTER SEEDLINGS IN "EASI-OFF" PLANT BANDS For Prices, see Supply Section

While the florist varieties of Asters offered are resistant to yellows and similar diseases, it is not absolute with the result that the

## IPOMEA—Red, White and Blue Morning Glories

### "SCARLETT O'HARA"

(Awarded Gold Medal, All-America Selections, 1939.)

"Scarlett O'Hara" is an entirely new color in a Morning Glory, a rich dark wine red, or deep rosy crimson. Few introductions in recent years have caused so much interest prior to the introduction and now that "Scarlett" is with us, we can say it warrants all that was expected earlier. Though the flowers are not as large as "Heavenly Blue," they are of good size, about 4 inches in diameter, and freely produced on fast-growing vines which start blooming within 65 days after seed is sown. The dark green foliage does not make a heavy growth.

NOTE! In order to produce freedom of bloom, sow seed in pots or tin cans and insert in soil in the open.

### "PEARLY GATES"

(Awarded Silver Medal in All-America Selections)

A sport from, and seemingly identical in growth, foliage and bloom, except white in color, with Clark's Early Heavenly Blue Morning Glory. A grand companion for its most popular counterpart. A big, satiny white with a creamy shading in the throat, gives this a beautiful appearance. Plant with Heavenly Blue and Crimson Rambler or Scarlett O'Hara for red, white and blue effect. Reaches 12 feet, with luxurious foliage, wherever Morning Glories will grow.

### "HEAVENLY BLUE"

**Clark's Early-Flowering.** This strain is well known and widely used throughout the United States. It is early-flowering and makes a sparse growth of foliage. When growing Ipomoeas, care should be taken to plant them in a dry, sandy location, and fertilizer should never be applied. One of the most admired flowering vines at the Chicago Century of Progress. This climber made a beautiful showing on the back wall of the Horticultural Building. A color of pure, unrivalled beauty. Tr. Pkt.....15c Oz.....75c 1/4 lb.....\$2.00

**Cornell.** So named because it reproduces the colors of Cornell University; this Morning Glory has giant carnelian red flowers with a pure white border, the flowers measuring as much as 3 1/2 inches across. Resembles "Scarlett O'Hara" in color but has the contrasting white margin. Tr. Pkt.....15c Oz.....\$1.35

**Crimson Rambler.** Very similar to "Scarlett O'Hara" but with white throat and heart-shaped leaves. This is a beautiful climber, but not suitable for window boxes as is "Scarlett."

Most attractive, very compact, scabious-flowered, canary yellow. Only 6 to 10 inches tall, uniform, very early and continuous flowering. Bright and luminous bedding or edging variety which you can't help but like. Rich, dense foliage, well covered with small 1 1/4-inch blooms. **MARIGOLDS (Continued)****MISSION GIANTS**

A new class of Marigolds of medium height with giant Chrysanthemum blooms. Plants grow about 18 inches high with a good amount of vigor, having a base branching habit producing 8 to 12 stems of excellent cutting length. An early blooming class about 2 weeks earlier than the African type. Blooms 4 to 5 inches in diameter forming an almost perfect ball. They remind one of an incurved type of Chrysanthemum. A real addition to the Marigold family.

**Goldsmith.** Rich golden orange.

**Fire Cross.** Single dwarf light orange, resembles Legion of Honor except that the yellow on outer edge of petals is a deeper golden shade. Also we find Fire Cross some earlier flowering and more compact. A valuable outdoor variety. 12 to 14 in.

Tr. Pkt.....15c    Oz.....70c

**Legion of Honor.** A well known dwarf single. The lemon-yellow in this variety contrasts brightly with the mahogany center. Both the above two dwarf singles are valuable for early flowering in small pots.

Tr. Pkt.....15c    ¼ oz.....30c

**Redhead.** All-America Selection. A most interesting recent introduction. Large crested flowers 2 inches across, with broad, overlapping petals. Mahogany color, changing to auburn and later to bronze. Blooms early and continues throughout summer. Excellent for low borders. Tr. Pkt.....35c    ¼ oz.....\$1.00    Oz.....\$3.00

**BURPEE RED AND GOLD HYBRIDS**

A cross between African and French Marigolds. These are the earliest of all Marigolds. Will flower in less than eight weeks from seed. The color varies with the season and the growth of the plants. At times it becomes pure yellow and at other times a bright rich mahogany red. The flowers are nearly three times the size of the largest French Double. They grow 1½ ft. tall, 2 ft. wide and are literally covered with flowers at all times. Tr. Pkt.....50c    ¼ oz.....\$2.25

**GIANT FLOWERED**

**Gigantea Sunset Giants** is a Novelty from California; it is said to have the largest known flowers in the "Marigold" group, averaging 5 inches and some flowers attaining a size of 7½ inches across. Instead of the usual "Marigold" odor these flowers have a definitely sweet fragrance. This is a mixture ranging from deep orange through golden orange, deep golden yellow, light yellow, lemon yellow, and a delightful new shade of primrose. The strain comes from 60 to 65 per cent double. The plants are normally 3½ to 4 feet high, but under favorable conditions have been known to grow as much as 7 feet high. Excellent for cutting.

Tr. Pkt.....25c    ¼ oz.....50c    ½ oz.....95c    Oz.....\$1.75

**Gigantea Orange Sunset.** The color is a deep, rich, lively orange, one of the most admired shades found in the Sunset Giants Mixture. The plants are strong growing, upright branching in habit, usually about 3 feet tall, producing a heavy growth of foliage, and with 6 to 8 heavy branches, each bearing 3 to 6 large flowers. Blooming commences about the first of August in most sections of the country, in late June in the southern states, and flowers can be depended on

well before frost in any latitude. Orange Sunset has been tested and found to be a fine forcer in the greenhouse, and will come over 65 per cent double.

Tr. Pkt.....20c    ¼ oz.....50c    ½ oz.....95c    Oz.....\$1.75

**CARNATION FLOWERED**

**Yellow Supreme.** Creamy lemon-yellow, loose petaled, 2- to 3-inch flowers produced on nice stems for cutting. 2½ feet.

Tr. Pkt.....20c    ¼ oz.....50c    ½ oz.....95c    Oz.....\$1.75

**Guinea Gold.** Light attractive orange-colored flowers, about 2 inches, and very freely produced throughout the summer. No retail grower should be without a row of this and Yellow Supreme. 3 ft.

Tr. Pkt.....20c    ¼ oz.....50c    ½ oz.....95c    Oz.....\$1.75

**Burpee Gold Improved.** Odorless foliage. Here is truly a Marigold with a host of things to commend it—even, rich, deep orange color, large flowers, 3½ inches across, beautiful Carnation-like form, attractive habit, uniformity of color and blooming time, full doubleness with no singles, earliness, and above all absolute freedom from the usual Marigold odor. Flowers somewhat resemble Guinea Gold, being made up of loosely arranged rays or petals which are shallowly fluted.

Tr. Pkt.....25c    ¼ oz.....50c    ½ oz.....95c    Oz.....\$1.75

**TALL AFRICAN ALL-DOUBLE**

Large, double flowered; a valuable class for cutting. 3 feet.

**Orange.** Not quite so large as Prince of Orange, the percentage of doubles will run much higher, 80 to 85%, with a few semi-doubles.

**Lemon.** Same high grade percentage as in All-Double Orange. The demand for these colors usually calls for about 25% of the All-Double Lemon.

Tr. Pkt.....20c    ¼ oz.....50c    ½ oz.....95c    Oz.....\$1.75

**Mixed.** Mixture of both above colors.

Tr. Pkt.....20c    ¼ oz.....40c    Oz.....\$1.50

**AMERICAN BEAUTY HYBRIDS**

**Chrysanthemum Flowered.** These beautiful types are quite variable and are most desirable. The beautiful colors are most fascinating and can best be described as containing all shades of orange and yellow. The plants are about two feet high, supporting masses of flowers on fine stems for cutting.

**Limelight (Dwarf).** Primrose yellow or deep cream.

Tr. Pkt.....25c    ¼ oz.....50c    Oz.....\$1.65

**Golden Bedder (Dwarf).** Extra early flowering variety, Sunshine type. Beautiful golden orange color.

Tr. Pkt.....25c    ¼ oz.....55c    Oz.....\$1.85

**MISCELLANEOUS VARIETIES**

**Idabelle Firestone.** Flowers are double, 2 in. and more across, bright reddish mahogany and borne on long, clean stems, ideal for cutting. About 3 feet tall. Tr. Pkt.....20c    ¼ oz.....35c    Oz.....\$1.20

**DWARF GIGANTEA**

**Pot O' Gold.** Brilliant orange blooms, 100% all double plants are semi-dwarf, compact, and blooming is profuse. Don't overlook a good planting.

Tr. Pkt.....25c    ¼ oz.....75c    Oz.....\$2.50

**AFRICAN LITTLE GIANTS**

**Mixed.** Throws blooms varying in form from the informal Carnation type to the perfect *Fistulosa* globe. The plants are very closely compact and the stems short. Its foliage is a beautiful dark bluish green. Although Little Giants range in height from 10 to 15 inches, a fraction percentage of taller plants will show up. However, these are easily detected at the transplanting stage as they all have light colored foliage—Little Giants being a deep bluish green. Little Giants is strongly recommended for bedding and pot plants, especially the latter—as it will bloom ahead of twenty-five flowers all at the same time. Color ranges from a yellow to a very bright orange, with many shades in between. Tr. Pkt.....25c    ¼ oz.....75c    Oz.....\$2.50

### HARVESTING A.B.C. "SUPREME QUALITY" SEEDS

1. Light wooden rollers drawn by a team are passed over the harvested seed pods to separate the seed and force them onto an underlying canvas.

2. Suspended sieve trays separate the coarse material from the seed and fine chaff, allowing the seed to fall on clean canvas. Further cleaning then takes place.

**Bibb Lettuce.** A delicacy for American dinner tables. CRISP, TENDER, DELICIOUS . . . a few descriptive words from florists who last year got a real salad thrill for the first time with Bibb Lettuce. With a distinct flavor all its own, you get more in BIBB than any other Lettuce. Heads small, somewhat loose in form, the outer leaves are dark, glossy green and vitamin-packed, bleaching to a waxy golden-green heart. You haven't eaten real Lettuce until you've eaten BIBB. CULTURE: Similar to other Lettuce. Start seed under glass or sow direct. Set or thin plants to six inches apart in the row. Like other head varieties, will bolt in hot weather. Plan for crops in cool of Spring and Fall or grow under lath or shade during Summer. Cut heads just as center begins to extend.

VENTURA

**VENTURA**

This variety needs no introduction to many of you. Very early, the solid fruits produced are smooth and weigh between 4 and 8 ounces. It will ship long distances and is resistant to blight. Our sales of this variety have consistently shown an increase over the years we have been offering it.

RUTGERS

**RUTGERS**

A heavy producer that bears fruits of good size well into the season. Especially recommended as a second early variety for canning and for juice. Fruits are of medium large size, slightly flattened as shown in the picture above. Scarlet-red in color. Plants set June 1st should bear fruit in about 73 days.

## COMPLETE BUILDING INSTRUCTIONS FOR CLOTH HOUSES

Measure out a perfect rectangle on the ground, each side of the rectangle being 33 feet if you plan a house 33 feet in width, or if larger, some multiple of 33 feet. Posts to be placed in the ground three feet deep, to carry the wires at positions that will line the wires in 16-foot-6-inch centers, in every direction.

If you plan a 33 foot wide house, it will require no inside posts; in a 66 foot width house you will need one row of posts inside, and in a 99 foot width house two rows of posts inside. IN ALL SIZE HOUSES BE CAREFUL THAT THE POSTS ARE PLACED TO CENTER THE SUPPORT WIRES EXACTLY 16 FEET 6 INCHES, so the top cloth made 33 feet wide with allowances will fit the frame.

Fig. 13

Each outside post must be anchored rigidly with a dead man, and each corner post must have two dead men, one anchored against each side of the rectangle. Dig a hole about three feet deep, six feet away from the post, take a 24-foot length of No. 8 galvanized wire, double it and loop one end around the post 6 feet 6 inches from the ground, attach the other end to the dead man and bury it, then twist the wire with a stick as in Fig. 13 until the post is in line; nail the 6-inch baseboard in position around the outside of the house. Place two 1½-inch staples six feet above the ground on each post so the No. 8 galvanized wires will pull through easily and use wire stretchers to stretch the

wires taut. Stretch the wires from the corner posts only, as corner posts have two dead men, one anchored against each side of the rectangle, stretch the wires until they have the proper rigid tension and then drive staples in fully to hold wires.

If you have inside posts they may be placed to hold the support wires and cloth 6¾ to 7 feet in height, giving more head room with the same width of cloth.

The cloth is rolled and folded and will be easy to lay if care is taken to follow directions.

To cover the top unroll the cloth at one end of the frame and with several men lift it across the support wires, leaving about a yard hanging over the end wires so you can adjust it later; unfold a few yards lengthwise besides the frame, then take the selvage edge of the house top and the selvage edge of the side-wall and roll them together five times around the side wire, where you have surplus cloth on the ends wrap this around the wires and sew it, as it protects the cloth where the strain centers on the support wires. Pin the cloth in place with 8-penny wire nails, pin 10 or 15 feet before you begin to sew, stretch the cloth only enough to keep the sagging out and be sure to keep the lengthwise reinforcement woven lines at an even distance parallel with the length of the wire.

Start at the post and sew by whipping around the wire, using a tight lock stitch, so that the cloth will not slip; do not whip the thread along the wire more than 3 inches before lock stitching again. As you sew have the cloth pinned ahead of you 10 to 15 feet all the time. After this side is finished unfold the cloth to the other 33 feet side support wire and pin before sewing, making sure that the woven reinforced lines are at an even parallel distance from the support wire; sew ends with the same method. Only sew the cloth to support wires. Fasten the sidewalls to the baseboard with the new aluminum fasteners every 9 inches instead of using the old lath strip method, as this will prevent the cloth from rotting at the baseboard from dampness.

A very good idea to prevent the cloth from chafing and wearing out the yarns is to cover the rough joints of the baseboard and also wrap the posts with either heavy paper or old cloth. Where wires are spliced cover them with some kind of wrapping.

### AMOUNT OF CLOTH REQUIRED TO COVER DIFFERENT SIZE STANDARD HOUSES

A little more cloth than the actual measurements of the frame, as additional material is needed for rolling around the wires and for slight variations in fitting the cloth to the frame when sewing.

## NEW DWARF RUFFLED PETUNIA

### Garden Giants

The outstanding feature of this new variety is its satisfactory plant growth. The plants uniformly develop into well-rounded mounds 12 to 15 inches high. They start flowering when extremely small and continue their gorgeous display all through the summer, holding their size and ruffling even under the adverse conditions of heat and dryness. Because of its uniformity and continuous blooming, it is by far the best variety of Giant Ruffled Petunias for borders we have ever seen. The mixture includes a wide variety of bright color combinations.

**GLOXINIA CULTURE**

Gloxinias are fit companions for the tuberous rooted Begonias and the fancy leaved Caladiums. Their richly colored flowers are most outstanding. Start the tubers in 4-inch pots in a mixture of leaf mold, sand and a little well-rotted cow manure with good bottom heat. Keep shaded and as the leaves appear, be careful with the watering. You cannot do it with the hose, so make use of the old-fashioned way, the watering can, and go over each plant carefully, examine every one and don't apply water unless it is needed, on the other hand, they suffer every bit as much if they don't get water when ready for it, for they want a moist soil. Keep the leaves dry. To get them moist on a hot day early in the morning doesn't hurt, but they soon go if you wet them every time you water the plants. They want most of all a little shade, but if you overdo it you may obtain foliage but no flowers.

*Begonias***TUBEROUS ROOTED BEGONIAS****Belgian Grown****Large Flowering Type**

With its bright colors, richness of foliage and easy culture it has become a favorite with the public in gardens and homes.

**EMPLACEMENT.** The begonia prefers partial shade and not too warm a place where they will give best results specially in wet summers. For the cultivation in greenhouses, shade is necessary.

**CULTIVATION.** Forcing can be started in February, March or April, depending on the time they should be in flower. The bulbs are placed in boxes, on light porous soil close together, and then covered with earth to a depth of one inch above the bulb. The earth should be kept just moist, too much water will rot the bulbs.

When the plants begin to develop they are placed in pots.

Our Canna roots are strong, healthy, true Northern Grown. The varieties listed below have proven indispensable where large exhibition showings are needed. Early ordering is suggested, because of the great demand this year.

**City of Portland.** Deep pink. Green foliage 3½ feet. Extra good flower. Does not fade.

**Dorothy S.** A new dwarf continuous flowering clear salmon red Canna. Produces large flowers and grows about 4 feet tall. Very vigorous and drought resistant.

**Hungaria.** 3½ feet. LaFrance pink.

**King Humbert.** This remarkable Gold Medal Canna has been the sensation of the past ten years and is the greatest favorite today. Handsome, broad, tropical foliage. Scarlet flowers; bronze leaves. 4 feet.

**Yellow King Humbert.** 4 feet. An orchid-flowering sport of the well-known King Humbert. Flower a deep, rich yellow, softly spotted and blotched with bright red.
